FIDELIS
MANAGED
SERVICES

Protecting and Enhancing
Your IT Environment

Introduction

In today's fast-paced digital world, it is essential to have a reliable, secure and efficient IT environment to support your business operations. Fidelis understands the importance of technology in business and offers Managed IT Services to help you manage and secure your IT environment.

Elements of Fidelis Managed Services

Network Operations Centre (NOC) Solution

Security Operations Centre (SOC) Solution

Asset Management Solution (AMS)

> " With Fidelis Managed Services, organizations can enjoy the benefits of efficient and secure IT operations, while reducing operational costs and ensuring that their critical assets are protected. The solution enables organizations to focus on their core business activities, knowing that their IT environment is in good hands.

Integration of NOC, SOC and AMS Solutions

Fidelis, a provider of cybersecurity services, offers a unified approach to managing an organization's IT environment by integrating its Network Operations Centre (**NOC**), Security Operations Centre (**SOC**) and Asset Management Solution (**AMS**) solutions. The integration of these solutions brings significant advantages to businesses by helping them to improve the performance of their IT infrastructure, protect their assets and stay ahead of security threats.

## Advantages of Integrating NOC, SOC and AMS Solutions:

- Improved performance
- Increased security
- Cost savings
- Improved efficiency

> According to research, the integration of **NOC, SOC** and **AMS** solutions has resulted in a 25% decrease in network downtime, a **50%** reduction in response time for security incidents and a **30%** increase in asset utilization. These improvements were achieved due to the increased visibility, centralized management and streamlined processes provided by the integration of these solutions.

Key Benefits

Fidelis Managed Services is a comprehensive solution for businesses seeking to optimize their IT environment.

Proactive monitoring and management of your IT environment
